Don't Risk IT, SECURE IT®

Cybersecurity and Compliance Specialists

The Cybersecurity Maturity Model Certification (CMMC) program was first introduced by the Department of Defense (DoD) in January 2020 to focus on the security of sensitive data known as Controlled Unclassified Information. It replaced DFARS 252.204-7012, which was based on NIST SP 800-171 and allowed contractors to self-certify their cybersecurity compliance.

In November 2021, the DoD published CMMC 2.0 to simplify the CMMC security framework and streamline compliance requirements. CMMC 2.0 is aligned with NIST SP 800-171 and NIST SP 800-172 and is more inclusive of the small to mid-size suppliers and subcontractors who comprise 74% of the defense industrial base and who do not handle Controlled Unclassified Information.

Benefits of Preparing for CMMC with 24By7Security

- Approved by CMMC Accreditation Board as Registered Provider Organization authorized to assist you in preparing for mandatory CMMC compliance.
- Professional staff trained and approved as Registered Practitioners.
- Well-versed in the new, streamlined compliance model to ensure that you avoid missteps, wasted time, and unnecessary expense.
- Conducted more than 2,000 risk assessments against variety of regulatory requirements.

- Trusted advisor to hundreds of clients, including those engaged in defense contracts.
- Preparation includes security risk assessment conducted to CMMC 2.0 specifications, plan of action and milestones (POAM), and corrective action plan (CAP) for remediating security and compliance gaps.
- Failure to be certified at required CMMC 2.0 level will jeopardize open contracts and future work with DoD.
- Acting now will provide competitive edge over contractors who are not preparing for CMMC 2.0 compliance.

Our CMMC Services

- ✔ Conduct risk assessment of your current state against CMMC 2.0 requirements.
- ✔ Include vulnerability assessments, penetration tests, and other services as needed.
- ✔ Develop remediation roadmap to prioritize and address compliance gaps.
- ✔ Provide expert support, and assist with remediation actions as needed.
- ✔ Develop and document compliant security policies and procedures.
- ✔ Support your organization as you undergo your CMMC 2.0 assessment process for certification.
